

DIAMOND POLISHING PADS

Wet polishing reduces dust but makes a slurry that can be difficult to clean up. Dry polishing is convenient but does require you to manage the dust. Either method provides a great finish.

For use on concrete, marble, granite, engineered stone, greenstone, glass and tiles.

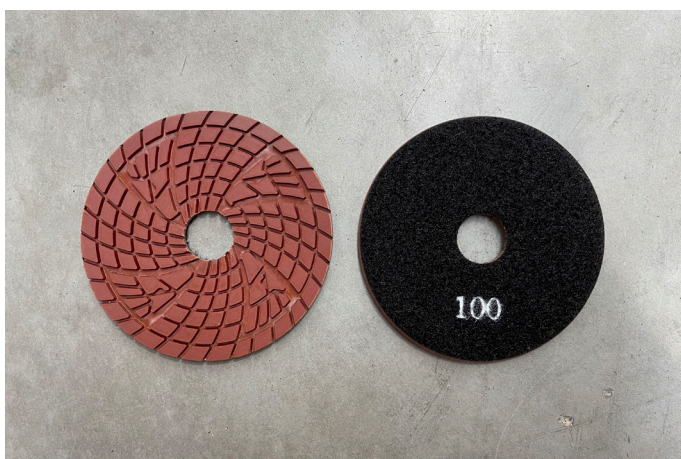

SPECIFICATIONS

-  Diamond polishing pads
3mm thick velcro backing
-  Backing pad M14 thread
velcro backing
-  Recommended operating
speed 9,500rpm
