

HDD THREAD GREASE - AUSTRALIA

If you haven't tried HDD KOPR yet - you're missing out.

It's been specifically designed to take copper and graphite based oilfield grade grease, but in a smaller particle size, to suit an HDD rig auto-greaser.

HDD KOPR

HDD KOPR is a very finely ground copper based grease designed to work well in autogreasers.

It is specified to prevent galling and reduce wear in very high torque situations.

Step 1. What rig are you running?

Step 2. Confirm which pail size is fitted to the rig.

Typical rig guide:

Vermeer® D7x11 to D100x120

Use Small 3.8L pails

Vermeer® D40x55 / D40x55DR

Use Large 21.8L pails

Ditch Witch® JT922 to JT100

Use Medium 7.6L pails

Astec/Toro® DD2024C, DD2426 and DD4045

Use Medium 7.6L pails

Maxi Rig Drills (Mixed OEM's)

Use Large 20L pails with dope brush to apply

MAXI RIG NCS-30 ECF

A premium thread compound that is exceptional for torque reduction, doubles as a storage compound and is environmentally friendly. This compound is easily applied to threads with dope brushes.

	HDD KOPR	NCS-30 ECF
Small 3.8L	1210015	
Medium 7.6L	1210014	
Large 20L	1930012 (21.8L)	1210151

DOPE BRUSHES

Made in Texas with durable bristles, these brushes are long lasting and will apply your grease with ease.

	Dope Brushes
Tapered	1210191
Moustache	1210193
Beveled	1210192
