

# PNEUMATIC PIERCING TOOL

The Grundomat® piercing tool can perform accurate bores up to 30 metres in a wide range of conditions.

The secret is compressed air repeatedly propels the piston against the rear of the chisel head assembly of the piercing tool. This first compresses the pre-tensioned steel spring which forces the chisel head assembly forward ahead of the main casing to provide a pilot bore. This thrust then pushes the casing ahead expanding the bore to the target diameter. With decades of proven performance, Grundomat's patented stepped-cone head consistently provides accurate results.

Grundomats are renowned for the longevity with many customers still operating Grundomats which are more than 20 years old. Simple preventative maintenance and using Grundo Oil® everytime will keep your Grundomat boring for years to come.

Model	Length (mm)	Air Consumption (CFM)
45P	990	12
55P	1092	18
65PK	1041	23
65P	1320	25
75PK	1244	28
75P	1447	32
85PK	1346	25
85P	1549	32
95P	1727	53
95PK	1524	46
100P	1727	53
110P	1676	64
130P	1752	92
145P	1981	120
160P	2006	159
180P	2209	159
