

PIPE TONGS

Crescent Pipe Tongs has spent over 50 years perfecting their form of pipe lifting equipment. They have eliminated the need for hazardous, unwieldy rigging and unsafe methods. Crescent Pipe Tongs is the safest and easiest to use pipe lifting equipment.

Their pipe lifting equipments can be used for all kinds of pipeline including:

- Concrete Coated Steel Pipe
- Bare Steel/IPS Pipe
- Concrete Cylinder Pipe
- Ductile Iron Pipe
- HDPE Pipe
- PVC Pipe
- Clay

Crescent Pipe Tongs are manufactured with the highest quality certified materials and manufacturing processes. The tools are made from aluminum alloy or steel with dimensions of 102mm to 406mm pipe in aluminium and 102mm to 1220mm pipe in steel.

Crescent pipe tongs are your answer for easy, safe and efficient handling of any type or size of pipe. Usable with virtually any type of crane or excavator, Crescent pipe tongs are easy to attach and release automatically with safety; speeding up job handling operations and allowing placement of pipe in trenches within a minimum working width.

Each tong is stamped with a safety load limit (which should never be exceeded) and for enhanced safety has been built to withstand three times the rated load.

All tongs conform to US state and federal safety standards, and comply with OSHA safety orders.
